SUMMARY

Enthusiastic front-end developer (recent graduate) with a strong understanding of HTML5, CSS3, and JavaScript. Developed 5+ projects using React.js and Responsive Design, including an e-commerce website with real-time cart updates. Eager to join a team where I can contribute to building user-friendly web applications while expanding my expertise. Committed to learning other technologies such as Next.js and TypeScript to stay at the forefront of web development.

SKILLS

- **Technical Skills:** HTML5, CSS3, SCSS, JavaScript(ES6).
- **Frameworks & Libraries:** React, React Router, Redux, Axios, Formik & Yup, I18next MUI, Bootstrap, Tailwind CSS.
- **Advanced Programming Concepts:** Data Structures & Algorithms, OOP.
- **Development Tools:** Git & Github, Vite.
- **Soft Skills:** Problem-Solving, Communication, Self-Learning, Adaptability.

PROJECTS

1- Grogin Project - Online Grocery Marketplace:

- **Description:** Grogin is an integrated and advanced e-commerce platform specialized in selling fresh and packaged food products. The project aims to provide a seamless and secure shopping experience for users, enabling them to browse and filter products intelligently, manage their shopping carts and favorites easily, and access food-related articles and tips through the blog section.

- **Live Demo:** <https://amr-elmasry3.github.io/grogin/>

2- Amazing - Multi-Category E-commerce:

- **Description:** Amazing is a one-stop online store that offers a unique shopping experience for a wide range of products that include apparel (such as laptops and phones), food, and more. The platform is built to be a one-stop destination that caters to all users' needs, with a focus on a modern and seamless user interface and ease of product discovery.

- **Live Demo:** <https://amr-elmasry3.github.io/amazing/>

3- Typing Speed Test App:

- **Description:** Speed Test is an exciting and interactive web game designed to test the speed and accuracy of typing. The game is based on the principle of challenge against time, where the player must type the words presented to them before the time allotted for each word expires. The game offers three levels of difficulty (easy, medium, hard) to suit beginners and professionals, making it suitable for everyone.
