SUMMARY

Enthusiastic front-end developer (recent graduate) with a strong understanding of HTML5, CSS3 and JavaScript. Developed 5+ projects using React.js and Responsive Design, including an [e-commerce website] with [real-time cart updates]. Eager to join a team where I can contribute to building user-friendly web applications while expanding my expertise. Committed to learning other technologies such as Next.js and TypeScript to stay at the forefront of web development.

SKILLS

- **Technical Skills:** HTML5, CSS3, Sass, Javascript (ES6)
- **Frameworks and libraries:** React, React-Router, Redux, Axios, Formik & Yub, i18next, MUI Bootstrap, Tailwind Css
- **Advanced Programming Concepts:** Data Structures & Algorithms, OOP
- **Development Tools:** Git & Github, Vite
- **Soft Skills:** Problem Solving, Communication, Self Learning, Adaptability

PROJECTS

1- Grogin Peoject - Online Grocery Marketplace:

- **Technicals:** HTML5, CSS3, Sass, JavaScript, React, React Router, Redux Toolkit, Axios, MUI
- **Description:**
 - Developed a full-featured grocery e-commerce platform with product filtering (price/category/rating), sorting.
 - Implemented state management with Redux Toolkit for cart operations (add/remove items, quantity updates).
 - Enhanced UX with **responsive design** (Sass, MUI), dynamic loading (React Lazy), and error handling (Error Boundary).
 - Enabling simple register and login with (Formik & Yub)
- **Live Demo:** <https://amr-elmasry3.github.io/grogin>

2- Amazing - Multi-Category E-commerce

- **Technicals:** HTML5, CSS3, JavaScript, React, React Router, Redux Toolkit, Axios, Tailwind Css
- **Description:**
 - Built a **multi-category e-commerce platform** (food, clothing, electronics) with product browsing, cart, and wishlist.

- Managed state efficiently using **Redux** and fetched product data from **DummyJSON API** via Axios.
- Designed responsive UI with Tailwind CSS and implemented dynamic filtering (by category, price,...), Pagination system for better UX

- **Live Demo:** <https://amr-elmasry3.github.io/amazing>

3- Typing Speed Test App

- **Technicals:** HTML5, CSS3, JavaScript [ES6]

- **Description:**

- Interactive typing test application with dynamic difficulty levels (Easy/Medium/Hard).
- Implementation of programming logic using vanilla JavaScript to control the appearance of random words according to difficulty level and monitor the time limit for each word
- Enhanced UX with LocalStorage to save high scores, Responsive design for all devices

- **Live Demo:** <https://amr-elmasry3.github.io/typing-speed-app>

ADDITIONAL INFORMATION

- **Languages:** English, Arabic
- **Certifications:** React Basics (Coursera (Meta)), Javascript (Mahara-Tech), Html & Css (Mahara-Tech), Basics Of DataStructures & Algorithms (SimpliLearn)
