SUMMARY

Frontend Developer with hands-on experience in React.js, Next.js, and TypeScript, with strong foundations in HTML5, CSS3, and JavaScript. Built several projects, including a real-time chat application and a React-based e-commerce platform. Passionate about creating responsive, user-friendly interfaces and continuously improving skills in modern frontend technologies.

SKILLS

- | | | | |
|-------------------|----------------|-------------------|-------------------|
| • HTML5 | • Next.js | • Tailwind CSS | • Formik & Yup |
| • CSS3 | • React.js | • Shadcn Ui | • I18next |
| • SCSS | • React Router | • MUI | • Git & GitHub |
| • JavaScript(ES6) | • Redux | • React Hook Form | • Data Structures |
| • TypeScript | • Axios | • Zod | • Algorithms |

PROJECTS

1- Yalla Chat – Realtime Chat Application: *Next.js, Supabase, Axios, Context API, Shadcn,...*

- Built a WhatsApp-like chat application with authentication and friend management.
- Implemented real-time messaging supporting text, images, audio, and video.
- Developed a dashboard with chats, contacts, calls, and settings using Next.js parallel routes.
- Integrated Supabase for database storage and real-time updates.

[- Live Demo: yallachat-rho.vercel.app](#)

2- Grogin Grocery – E-commerce Web Application: *React, Redux, React Router, MUI, SCSS,...*

- Built a multi-page e-commerce platform for grocery products using React.
- Implemented product filtering and sorting by price, category, and rating.
- Managed application state for cart and wishlist using Redux.
- Optimized performance using React Lazy, memoization, and Error Boundaries.

[- Live Demo: amr-elmasry3.github.io/grogin/](#)

3- Typing Speed Test - Web Game: *HTML5, CSS3, JavaScript(ES6).*

- Built an interactive typing speed test game using Vanilla JavaScript.
- Implemented multiple difficulty levels with different time limits per word.
- Used DOM manipulation to dynamically display words and manage game logic.
- Stored and retrieved user scores using LocalStorage.
